Bermuda Easter Lily.

Kept in "cold storage" until sent out by me.

MULTIFLORA, a special variety that blooms more freely than the common kind. These bulbs ripen so early in the fall they become worthless for planting in spring unless they are in cold storage until used. My bulbs are all treated in this way. These bulbs potted make fine plants for Easter and early spring blooming. They bloom magnificently planted outside. Fine for cutting at all times. These bulbs are kept especially for winter and spring sale and will produce 5 to 8 flowers,

Please write below the names of a few of your friends who buy plants, that I may send them my catalogue.

1913 | New Catalogue for Spring | 1913

DEAR FRIENDS—

I send you greetings for the future and my best thanks for the past, and trust I may merit your good will in the future, as I have had evidences of it for many years in the past. I realize fully that my modest little catalogue comes in competition with the largest firms in the country. Small as my catalogue is, you will note it contains as complete a list of Flower Seeds as the largest. I give my undivided attention to my business. I have no other interests to distract my attention, and I do not delegate it to managers or superintendents as so many larger houses do.

Gardening, an occupation that so many think of so little moment, is to me divine; the mystery and wonder working of nature and the Creator are shown more fully in the development of the little seed than in any other way. We plant a seed and reap a wondrous plant. No occupation is so healthful, so elevating, so satisfying. Nature stands ready to heap our table with the most healthful of foods, to adorn our houses with the most beautiful of decorations. Food and proper environment shape the human race more than anything else. Meat eating alone tends strongly to savagery. I hope soon to see horticulture taught in every school in the land; I am so strongly impressed with the importance of this, that I firmly believe the fate of the Nation, and the happiness of its people, depends on their willingness to heed the cry, "Back to Nature."

I am in no way whatsoever connected with any other seed or floral establishment doing business at Floral Park.

Sincerely yours,

FLORAL PARK, N. Y., Jan. 1, 1913. MARY E. MARTIN.

A Rose whose beauty has taken the country by storm. We regard it as one of the finest Roses in cultivation. It is highly scented and is a most magnificent Rose in the open ground. **15c. each; 3 for 40c. Two-year-old plants, 45c. each.**

Grand New Rose, Coronet.

Sweetest, largest, and freest blooming Hybrid Tea Rose in cultivation. No description or illustration can do justice to the remarkable beauty and splendor of its flowers which are a deep rich carmine. **15c. each; 3 for 40c. Two-year-old plants, 45c. each.**

Brugmansia, or Angel's Trumpet

Here is a plant for the masses. It grows easily, blooms freely, and the flower is something to be proud of. The Brugmansia blooms indoors in winter and in the garden in summer. The plant has large, tropical leaves, with blooms eight inches long by six inches wide at the mouth, resembling a trumpet, hence the name "Angel's Trumpet." Pure white in color and as fragrant as a Jasmine. **Blooming plants, 30c. each.**

Vinca Major Variegata

Moore's Early (*Blue*)

A large blue grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early grape. **Price, 15c. each; $1.50 per dozen.**

Niagara (*White*)

The most popular white grape in existence. Fruit large and very productive; a good grower; ripening same season as Concord; equally good; valuable in every way. **Price, 15c. each; $1.50 per dozen.**

Brighton (*Red*)

Concord (*Blue*)

An old variety, does well wherever planted; good size; productive. **Price, 10c. each; $1.00 per dozen.**

Moore's Diamond (*White*)

The color is a delicate greenish white, with a rich yellow tinge when ripe. Very few seeds, juicy, and almost entirely free from pulp, which makes it almost transparent. Berry size of Concord and two weeks earlier. **Price, 15c. each; $1.50 per dozen.**

American Wonder Lemon

In this wonderful Lemon we have the rich, glossy leaves like the dwarf Orange, which are so easily kept clean, and with them these giant fruits. Its blossoms are waxy white, like a Tuberose, and as fragrant as Orange blossoms. This is not only a show fruit, but equal in every way to ordinary Lemon, while ten times as large. The Wonder Lemon must take a place in every good collection of house plants. **Price; 15c. each; two for 25c.; two-year-old, 25c. each.**

Rex Begonias (Rubrum)

The entire leaf has a pinkish-metallic luster which makes it one of the most attractive varieties. The leaf is very large with a smooth edge and the plant is a vigorous grower. **Price, 20c. each.**

Asters, Crego's Giant

The plants are of branching growth, attaining a height of from two to two and one-half feet. The grand large flowers measure four inches in diameter, are quite thick through and have a peculiar curling of the beautiful reflexed petals in the center. **Price per pkt., 10c.; three for 25c.**

Grand Japanese Fern Balls

These pretty Japanese Fern Balls have proved very attractive to flower lovers for house and conservatory culture. They are made in Japan from a special variety of Mountain Fern, and though they are brown and dry when received, they require only heat and moisture to start in to lively growth. Set in a saucer or plate, partly filled with water and kept in a warm room they will soon be covered with a handsome growth of lovely emerald green fronds as shown in the illustration. **Price, 25c. each.**

Hardy Azalea Mollis

Bloom in May, in large clusters, before the leaves appear. They are the most brilliant-colored plants in the whole list of hardy shrubs, the prevailing colors being orange, yellow, buff, pinkish-red, etc. **Price, 50c. each.**

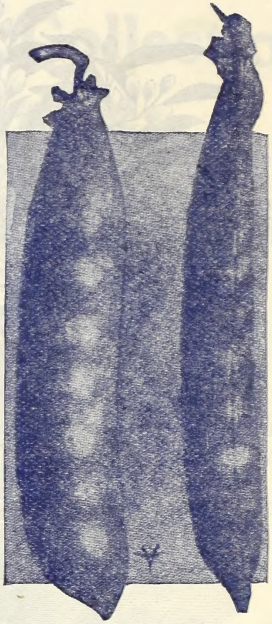
Strawberry, or Husk Tomato

See illustration to left, which is full natural size.

Plants of low-spreading growth and immensely productive. The small yellow fruit are each enclosed in a husk. Of very sweet flavor, highly esteemed for preserving or making pies. They are also excellent to eat raw as fruit. Price per pkt., 5c.; one-half oz., 15c.



Red Cherry

Little fruits of a bright scarlet color. Price per pkt., 5c.; one-half oz., 15c.

Country Gentleman

See illustration. This late or main-crop variety is the result of a cross of the *Ne Plus Ultra* with the *Stowell's Evergreen,* producing a larger ear than the former, but retaining its productiveness, similar fine quality, and irregular *"shoepeg"* arrangement of the crowded, slender, deep grains. The ears, being so much larger than those of the original type, are more desirable in most localities as a market variety. Price per pkt., 10c.; pint, 25c., postpaid.

Champion of England

The best late season tall Peas. Although one of the oldest variety of peas we have not yet found one to surpass it in quality. There is no sweeter Pea than the Champion of England. The vines grow about five feet high, are very vigorous and produce a heavy crop of good-sized pods filled from end to end with luscious peas. Price per pkt., 10c.; pint, 25c.; qt., 50c.

Fordhook Bush Lima

The Burpee-Improved Bush Lima

will outyield *Burpee's Bush Lima* by fully one-third. This greater yield is due to the increased size of both pods and beans. The dried beans are very handsome and generally show a greenish-white coloring, while dried beans of the *Burpee Bush Lima,* like those of the Large Pole Lima, are pure white. Price per pkt., 15c.; one-half pint, 25c.; pint, 40c., postpaid.

Directions for Planting and Cultivating Hybridized Potato Seed

Potato Seed-Balls

Plant in a hot-bed, window-box, or warm border, early in the spring—covering the seed one-fourth inch with fine soil and press firmly. Water sparingly when dry. As soon as plants are up, give them plenty of sunshine and air. Do not crowd them. When two or three inches high and danger of frost is past, transplant in rich soil two feet apart—and one foot in the row. Keep free of bugs by careful picking, or cover plants with mosquito netting. Allow no weeds, and cultivate thoroughly. When ripe, dig and store tubers carefully in a cellar until the next season, when plant same as mature potatoes. The tubers will grow from one-half inch to two inches or more in diameter the first season, and in two or three years will attain their full development.

POTATO SEED. Packet 15c.; 2 for 25c.; 5 for 50c.; 10 for $1.00; 100 for $8.50 Prepaid
